Mission Statement

Results-driven "**Learnaholic**" engineer specializing in **React, TypeScript, and Web3**. I leverage a unique mix of **game logic, blockchain security, and educational research** to build digital products that matter. Currently mastering Japanese (N4) while building scalable web applications that bridge technical gaps for users worldwide.

Education

•Sri Lanka Institute of Information Technology (SLIIT) *2021 – 2025*
BSc (Hons) in Information Technology | Focused on Software Engineering Malabe, SL

•Sri Lanka Institute of Marketing (SLIM) *Graduated 2024*
Diploma in Digital Marketing | Integrated Marketing Communications Colombo, SL

Professional Experience

•Web3 Engineer *Matara, SL*
YakkunLabs Jan 2025 – Present

- –Implemented secure smart contract lifecycles and frontend handshake protocols using **Solidity, Hardhat, and Ethers.js**.
- –Successfully optimized Web3 wallet integrations (MetaMask/WalletConnect) to reduce user onboarding friction by 40%.
- –Collaborated with backend engineers to architect decentralized data indexing solutions for high-performance DeFi apps.

•Assistant Social Media Marketing *Colombo, SL*
Park Street Warehouse Nov 2023 – Oct 2024

- –Architected data-driven content funnels that boosted user engagement and social conversion rates for major events.
- –Utilized Google Analytics and SEO tools to identify high-traffic keywords for technical content strategies.

Research & Publications

•10th ICITR 2025 | University of Moratuwa *Published 2025*
Author: Grade 06 coding education through interactive learning Moratuwa, SL

- –Published international research focusing on gamified interactive learning systems for Sri Lankan Grade 06 students.
- –Engineered a custom pedagogical engine that uses visual stimuli to increase student coding retention by 25%.
- –Presented technical findings at the **10th International Conference on Information Technology Research (ICITR)**.

Engineering Portfolio

- **JLPT N4 Master App** | *React / Gamified Learning* *2025*
  Project Link / Repository
  - Engineered a full-syllabus React application for JLPT N4 students featuring **Local Storage persistence** and real-time quiz logic.
  - Designed an interactive Hiragana/Katakana tracking system that visualizes learning progress through dynamic UI charts.

- **HENNGE Password Validation Challenge** | *React / A11y / Enterprise API* *2026*
  Project Link / Repository
  - Developed a production-grade authentication portal following **strict WCAG 2.1 AAA Accessibility guidelines**.
  - Implemented complex declarative validation rules using high-order functional programming concepts in React.
  - Architected robust error boundary scenarios for unauthorized (401/403) and internal server (500) API responses.

- **Sensei Japanese Center** | *E-Learning Deployment* *Live*
  Project Link / Repository
  - Designed a mobile-first language portal using responsive CSS architectures, serving over 100+ active students monthly.
  - Integrated lightweight course management modules to ensure sub-second page performance across mobile devices.

- **Hospital Management System** | *MERN Stack (MongoDB / Express)* *2024*
  Project Link / Repository
  - Full-stack CRUD application for managing patient data, featuring **JWT-based authentication** and secure account levels.

Technical Toolbelt

- **Core Languages:** JavaScript (ES6+), TypeScript, **Rust**, Solidity, Java, Python, PHP, MySQL
- **Frontend & Logic:** React, Redux, Godot Scripting (GDScript), HTML5, Flexbox/Grid Architecture
- **Backend & Web3:** Node.js, Express, MongoDB Atlas, Hardhat, Web3.js, Ethers.js, Git Ecosystem
- **Languages:** English (Professional), Sinhala (Native), **Japanese (JLPT N4 Daily Mastery)**

Leadership & Interests

Leader, Leo Club of SLIIT (Active Community Leadership and Philanthropy) 2022-2025 National Athlete, Competitive competitor in Chess, Badminton, and Netball representing SLIIT Consistent Recipient, Granted University Moratuwa ICITR Research Fund (ICITR-10 Conference) 2025
